Subject: Thank you - RE: Topics - setting up meeting or conference call with epa, navy, dtsc about shipyard environmental studies

Dear Derek,

Thank you for sending this. I was going to start looking for a summary type document, but I'm glad you beat me to it! I hope this will help him. In the mean time, Nina and I have been working on researching another question from the same organization.

- Lily

Dear Mr. Hirsch,

I was forwarded the below list of topics from Ms. Lily Lee. The attached document on radiological work at Hunters Point may answer a majority of your questions. Besides the body of the text, Table 1 may also be useful.

Please feel free to contact me if you have any questions.

Best Regards,

Derek J. Robinson, PE

Lily,

Among the technical issues about which we have questions and for which it would be helpful to have your technical people available who can answer questions in those areas are:

1. How the remediation goals for radionuclides were derived.
2. How the risk estimates for specific estimated radiation doses were derived, and how those doses themselves were derived.
3. The standards that have been and are being used to declare materials to be or not be low-level radioactive waste and where these materials have been and are being sent for disposal or recycling.
4. Questions about pre- and post-remediation risk assessments for both chemicals and radionuclides.
5. Numerous questions about status of characterization, environmental impact review, and remediation for different portions of HPBV.
6. Availability of various key documents.

We have some general questions about the above subject areas, but also detailed specific technical questions
